

WRAPmail setup for free Google Business Apps Account

Go to Google Apps domain control panel.

- Click on “Users and groups”
- Select the user account you want to have use WRAPmail
- at the bottom of “Nicknames” you select “Add a nickname”
- Choose an alias (nickname) you want to use and click “Save changes” at the bottom

After this step you go to your Google Apps mailbox.

- When in your mailbox on the desktop click on “Settings” at the top right of the screen.
- Then click the tab “Accounts”
- Under “Add another email address you own” there is an extra option:

When receiving a message:

** Reply from the same address the message was sent to*

** Always reply from default address (currently admin@mydomain.com)*

We prefer the first option, then if i reply to a new email send to my alias it will automatically reply with the correct “From” alias

- Press “Add another email address you own”
- At “Email address:” type the alias / nickname you entered at your Google Apps control panel.
- At “Name:” enter the name you want to be displayed when an email is sent from this alias.
- Click “Next Step”
- This is the important step ! Choose the second option !
“Send through mydomain.com SMTP servers (recommended for professional domains – Learn more)”
(if you choose the first option the mails will be sent with the mention: “on behalf of” !
- Now enter in the field “SMTP Server:” mail.wrapmail.com
- Select port: 25 and check “unsecured connection”
- Now enter in the field “Username:” your WRAPmail username

- Now enter in the field "Password:" your WRAPmail password
- Then press the button "Add Account"
- Now a confirmation mail is send to your main Google Apps account
- In that mail click the confirmation link or copy the confirmation code to the window and press "Verify"
- Set the "nickname" account as default
